Professional Summary

Software Engineering student with hands-on full-stack development experience across Java, Python, and JavaScript. Built and shipped three full-stack projects using React.js, Node.js, Flask, and MongoDB, and completed an AI/ML virtual internship with Google for Developers. Strong foundation in DSA, DBMS, and Operating Systems. seeking an entry-level Software Engineer role.

Education

B.Tech - Computer Science and Business Systems Expected May 2027
K.S. Rangasamy College of Technology (Autonomous), Tiruchengode, Tamil Nadu | CGPA: 8.06/10

Higher Secondary (12th)

Government Higher Secondary School, Periyapatti | Percentage: 72.5%

Technical Skills

- Programming Languages: Java, Python
- Frontend Technologies: JavaScript, HTML5, CSS3, React.js
- Backend Technologies: Node.js, Express.js, Flask
- Databases: MySQL, MongoDB
- Tools & Platforms: Git, GitHub, VS Code
- Concepts: Full Stack Development, Generative AI Fundamentals, Prompt Engineering

Projects

CampusCred - Centralized Student Activity Management Platform

- Developed a role-based web application for managing student certificates, achievements, and academic activities.
- Implemented modules for certificate uploads, mentor approval workflows, and digital portfolio generation.
- Designed an academic management system supporting semester-wise records and CGPA calculations.
- Improved data organization and accessibility through centralized student profiles.

Technologies Used: Python (Flask), MySQL, HTML, CSS, JavaScript, Bootstrap

AI Resume Analyzer

- Developed an AI-powered application that analyzes resumes and provides ATS-friendly recommendations.
- Implemented skill analysis and resume evaluation functionalities using AI technologies.
- Designed an intuitive user interface to improve user experience and resume optimization.

Technologies Used: React.js, Flask, MySQL/MongoDB, Generative AI APIs

Grocery Shop Website

- Built a responsive full-stack grocery shopping platform supporting product management and seamless user interactions.
- Implemented frontend-backend integration and database connectivity for efficient data management.
- Designed reusable and responsive UI components to enhance usability.

Technologies Used: React.js, Node.js, Express.js, MongoDB

Internship Experience

AI/ML Virtual Intern - Google for Developers (via Eduskills) Jul 2025 - Sep 2025

- Completed a virtual internship focused on Artificial Intelligence and Machine Learning under Google for Developers.
- Gained hands-on experience in data preprocessing, model development, and evaluation using Python.
- Implemented machine learning algorithms for classification and predictive analysis.

Certifications

- Data Structures and Algorithms using Java - Infosys Springboard
- Introduction to MongoDB for Students - MongoDB
- Frontend Development - Coursera
- Unleashing Innovation: The Generative AI Revolution - AWS
- Design Thinking - Infosys Springboard

Achievements

- Selected for IEEE YESIST12 2026 Maker Fair (Abstract Accepted).
- Participated in hackathons, technical workshops, and AI-related events.
